

**Breve biosketch:**

Carlos Fernández de Larrea completed his training in hematology at Hospital Clínic in Barcelona. His doctoral thesis was awarded with the Extraordinary Award of the University of Barcelona. He has been visiting investigator at the Centre for Amyloidosis of Pavia, the National Cancer Institute in Bethesda, as well as at Memorial Sloan Kettering Cancer Center in New York for 18 months, working in CAR-T cells for myeloma. He is currently consultant of the Department of Hematology at Hospital Clínic de Barcelona, research group leader at IDIBAPS and Professor at the University of Barcelona. He participates actively in clinical trials for multiple myeloma and macroglobulinemia and in preclinical studies in monoclonal gammopathies, including new generation of CAR-T cells.
