

Biosketch

Anders H. Lund graduated from the University of Aarhus, Denmark, in 1996. He trained as a postdoc at the University of Aarhus (1996-1999) and the Netherlands Cancer Institute (1999-2004) where he worked on the identification of novel oncogenes. He was appointed associate professor at the Biotech Research and Innovation Centre (BRIC), University of Copenhagen in 2004, became full professor in 2009, and was appointed Director of BRIC in 2019.

With a focus on RNA modifications, translation and specialized ribosomes, the aim of the laboratory is to unveil fundamental biological mechanisms and understand how these become perturbed during diseases.
